

Protect your children online with Kindera

Protect your kids

With the **Kindera™** monitoring system, you can track your child's Internet usage from your browser in seconds and **protect** them against online threats. With smart **content filtering**, you set **restrictions** on what content is appropriate for your child and let **Kindera** notify you by email if content is being accessed outside of these guidelines.

Kindera allows you to

- **Supervise** all your home devices.
- **Monitor** your home Internet.
- Create **access schedules**.
- **Filter** content **by age**.
- **Block or allow** individual sites **on a timer**.
- **Instantly lock** access of a device.

And much more, all from your smartphone, wherever you are, using **simple** and **intuitive** controls.

Teach your children how to manage online distractions

Did you know that children and teenagers alike should have **less than 2 hours of screen time a day*** outside of doing homework? **Kindera** allows you, the parent, to specify both what your child can access on the Internet, and when they can do so. With Kindera's **access scheduling** system, create rules for when they can have Internet access and for how long they are online.

* According to the American Academy of Pediatrics.

Kindera is an Internet parental control solution designed for parents and families

“When it comes to Internet access, having the visibility and reassurance that the rules we have established are being followed is extremely comforting as a parent. Additionally, being able to do this from the palm of my hand through my smartphone is beyond convenient!”

- Nick O., Kindera parent

Support your children as they transition into young adults

Every child is different. With **Kindera**, parents are able to **create customized profiles** for each of their children, which will allow them to adjust restrictions on an ongoing basis as their children transition into young adults.

Are you ever ...

- **Frustrated** - When you find your child on Facebook when they were supposed to be doing homework?
- **Concerned** - When you learn about the dangers that exist on the Internet but feel helpless as to how you can help?
- **Worried** - When you notice that your child is constantly tired due to using services like Netflix or Youtube late at night without you knowing?

If so, **Kindera** is perfect for you.

Supervise your child online and set limits with **Kindera**
